Appendix N

Summary of Resequenced CPT Codes

This is a summary of CPT codes that do not appear in numeric sequence in the listing of CPT codes. Rather than deleting and renumbering, resequencing allows existing codes to be relocated to an appropriate location for the code concept, regardless of the numeric sequence. The codes listed below are identified in *CPT 2011* with a # symbol for location of the resequenced number within the family of related concepts. Numerically placed references (eg, **Code is out of numerical sequence. See...**) are used as navigational alerts to direct the user to the location of the out-of-sequence code.
