Appendix B

Summary of Additions, Deletions, and Revisions

►Appendix B shows the actual changes that were made to the code descriptors. New codes appear with a bullet (●) and are indicated as “Code Added.” Revised codes are preceded with a triangle (▲). The symbol ○ precedes codes that are recycled or reinstated. Within revised codes, the deleted language appears with a ~~strike through~~, while new text appears underlined. Codes with which conscious sedation would not be separately reported when performed at the same session by the same provider are denoted with the bullseye (⊙). The symbol ✎ is used to identify codes for vaccines that are pending FDA approval (see **Appendix K**). The symbol # is used to identify codes that have been resequenced (see **Appendix N**). CPT add-on codes are annotated by the symbol + (see **Appendix D**). The symbol ⊖ is used to identify codes that are exempt from the use of modifier 51 (see **Appendix E**). ◀
